

# DISPOSITION RENEWALS

## KEY PROCESS POINTS

### ENHANCED APPROVAL PROCESS

EAP was implemented in 2010 as the new process for submitting MSL, LOC, PLA & PIL disposition applications for oil & gas developments on public lands

### SHORT-TERM DISPOSITIONS

Approved EAP applications are granted 4 year short-term dispositions

### LONG-TERM DISPOSITIONS

Short-term dispositions are converted to long-term by submitting a final application before expiry

### AUTOMATIC RENEWALS

Automatic renewals of dispositions ended on September 4, 2014

### DISPOSITION AMENDMENTS

An amendment may be required for a renewal or a final application if there isn't a valid survey plan on file or if changes have occurred to the disposition

### STATUTORY DECLARATIONS

Field visits are required in order to meet the requirements of the Statutory Declaration

### REMOTE SENSED DATA

Mission can collect imagery via UAV or helicopter to increase the efficiency of data analysis in support of EAP applications

## SENSIBLE SOLUTIONS THAT OPTIMIZE YOUR BUSINESS

Current long-term disposition holders wishing to renew their lease must submit renewal applications no later than one year prior to the disposition expiry date, but renewal applications will not be accepted until at least half the term of the disposition has expired. If the disposition holder misses the one year pre-expiry deadline their application becomes non-routine and an amendment may be required for renewal.

Under current EAP regulations short-term disposition holders need to apply for an extended term before the expiry date or the disposition will become cancelled with outstanding obligations.

The automatic government renewals under the old process have been cancelled and all final applications and renewals must be applied for by the disposition holder.

Mission Geospatial has a team of professional surveyors and land administrators available to assess your regulatory risk and ensure your renewals and conversions are submitted and your projects keep moving forward.

Our team of professionals can review your disposition files and recommend the swiftest or most cost effective solution for ensuring your projects stay compliant.

Mission will work with you to customize the solution to suit your needs.
